

## **Gary McHale Announces Candidacy as Independent for Haldimand-Norfolk**

**Sept. 3, 2008**

This notice is my official announcement to run as an Independent Candidate in the riding of Haldimand-Norfolk in the current Federal Election.

It has become clear to people throughout Canada that there is a serious lack of accountable leadership in Ottawa and a complete failure by elected officials to be the Voice of average Canadians. True Leadership requires a passion for the issues faced by average people and the need for Leaders to Stand with the people.

There are serious issues faced by families within Haldimand-Norfolk and they need someone who will Stand with them to see these issues addressed. The established political parties will not allow individual MPs to take a stand, to be a voice or to directly aid people as they struggle. For far too long, MPs have promised to be a voice while seeking votes then become silent while people suffer at the hands of failed Government policies.

Across Haldimand-Norfolk farmers face difficulties, families struggle with the shortage of Doctors, the problems of Coal Fired Power at Nanticoke and the possibility of a Nuclear Power Plant being built in the riding, the need for Economic Development throughout the region, the absolute necessity of Property rights and the restoration of Law & Order are all issues that need a Strong Passionate Leader.

People need someone who will Stand side by side with them as these issues are addressed. As an Independent in Ottawa I will not be silenced, I will not give up and I will not abandon those in the riding. With me you will get the honest truth, the passion to represent you openly and the courage to Stand with the People. You will get a true Leader who will not be intimidated nor bow to political games.

On Election Day you have an option. You can vote for the establish political party member who you will never see again for another four years or you can vote for the person who has demonstrated the willingness to Stand side by side with the People this week and the next until the system is changed and the Government addresses the needs of the average person. In a democracy it is the people who should dictate policy to the Government and not Politicians dictating Government policies to the people.

Over the next six weeks I hope to earn your respect and your vote. It is an honour to run as an Independent Candidate to represent the people of Haldimand-Norfolk.
